SUMMARY

I am a recent graduate with a 3.20 GPA, focused on becoming a Frontend Developer while actively expanding my skills in backend, mobile development, and artificial intelligence. I have experience with modern frontend technologies like HTML5, CSS3, JavaScript, React, and Next.js, and I am currently learning Node.js to grow as a full-stack developer.

In addition, I train data models using Python and explore machine learning, combining web development and AI to build smarter applications. For my graduation project, I developed a mobile app using React Native, Node.js, and Firebase. I am a fast learner, team player, and eager to contribute to innovative development teams.

EDUCATION

Bachelor of Science in Computer Engineering	GPA: 3.20
Zonguldak Bülent Ecevit University – Zonguldak, Turkey	Sep 2021- Jun 2025

EXPERIENCE

Frontend Developer Intern

Dolunay R&D Software Consulting	June 2025 to July 2025
---------------------------------	------------------------

- Developed responsive web interfaces using React, Next.js, and Tailwind.css.
- Designed and developed an AI-powered recipe website offering personalized recipe suggestions based on user preferences and available ingredients.
- Project: AI-Powered Recipe Website – see “Projects” section for details.

Mobile Developer Intern

Dolunay R&D Software Consulting	July 2025 to August 2025
---------------------------------	--------------------------

- Worked on Android/iOS compatible mobile apps using React Native.
- Developed a location-based alarm app with a user-friendly interface and customizable features to support daily planning.
- Project: Mobile Alarm Application – see “Projects” section for details.

SKILLS / LANGUAGES

- JavaScript
- React
- React Native
- Next.js
- Node.js
- Python
- Firebase
- HTML
- CSS
- Tailwind.css
- English – Intermediate Level

PROJECTS

- **Portfolio Website**
Developed a performance-focused, responsive, and interactive web interface using React and Next.js.
Technologies: React, Next.js, JavaScript
Link: <https://github.com/giizzz/my-portfolio>
 - **AI-Powered Recipe Website**
Built an intelligent recipe website that suggests personalized recipes based on user preferences and available ingredients. The project allows users to save favorite recipes, upload new ones, and instantly search for recipes using integrated AI support.
Technologies: JavaScript, React, Tailwind.css, Next.js, Gemini 2.0
Link: <https://github.com/giizzz/Recipe-website>
 - **Mobile Alarm Application (In Development)**
Developing a mobile alarm app with location-based alarms and customizable features to assist with daily planning.
Technologies planned: React Native, JavaScript, Expo, Location Services API
 - **Data Training Model Application**
Created a Python-based application to train and test machine learning models using various datasets.
Technologies: Python, NumPy, Pandas
Link: <https://github.com/giizzz/YZ-veri-egitimi>
 - **Social Responsibility Website**
Developed a fully responsive website using JavaScript, React, Next.js, and CSS.
Link: <https://github.com/giizzz/web-site>
-
